

AFDD-Net Architecture

Anisotropic Factorized Dual-Decoder with MYO Soft-Gating

AG = Attention Gate | G = MYO soft-gate channel | Filters: 32 -> 64 -> 128 -> 256 -> 512

Anisotropic Factorized Block (AF-Conv)

Matches EMIDEC spacing ~ 1.5 x 1.5 x 10 mm

Training Objectives (M5)

Anatomy: Soft Dice + weighted CE
Pathology: Focal Tversky (a=0.65, b=0.35)
Topology: L_topo = path * (1 - MYO)
curriculum: warmup -> lambda=0.05

Legend

- Shared encoder (AF-Conv)
- Anatomy decoder + AG
- Pathology decoder + AG
- MYO soft-gating
- Skip connection (dashed)
